## Super Sock Calculator

*the pdf version*

An online calculator for toe-up (magic cast-on), short-row heels, two at a time socks. Print or save this PDF and input the measurements from the calculator.

### Measurements:

Go to the [Super Sock Calculator](#) and input your measurements or use the predefined measurements in the dropdown box. Note down measurements A, B and C in the brackets below. *\*See video: using the calculator\**

### Casting on at the toe:

You begin [Judy's magic cast-on](#) with [ A ] stitches on each needle and continue to work increases till you reach [ B ] stitches on each needle. *\*See video: starting at the toe\**

### Turning the heel:

Once you have knit [ C ] from the tip of the toes it is time to turn the heel. Here I use [shadow wrap short-rows](#), but you can use any other type of short-rows too. You work the heel on half of the stitches only - in this case [ B ] stitches. Knit the short-rows till you have [ A ] stitches left in the center. They you pick up the stitches again till you reach the full [ B ] stitches.

For speed I usually turn each heel separately and then pick up the remaining half of the stitches as it fits into the magic-loop method. *\*See video: turning the heel\**

### Finishing off:

Now continue upwards till you reach your desired length, run out of yarn or just get fed up. It is a good idea to begin ribbing at least 2.5cm (1") from the top. Cast-off using your favourite elastic cast-off. *\*See video: finishing off\**

Come and share your project with the [Super Sock Calculator Ravelry page](#).
